JOÃO GUILHERME SALES EPIFÂNIO

Full Stack Software Engineer (Python/React)

Fortaleza CE, Brazil
(Open to Remote / Relocation)
gem.epifanio@gmail.com
(85) 98511-4063
/joao-guilherme-se

Software Engineer with 3+ years of experience designing and building scalable backend systems and full stack applications using Python (FastAPI) and React/Next.js. Strong background in API architecture, relational database modeling, distributed systems integration, and production reliability. Experienced working in international environments and industrial projects in Germany. Focused on clean architecture, fault tolerance, and business-driven solutions.

TECHNICAL SKILLS

- **Languages & Frameworks**
  Python (FastAPI, Flask), JavaScript/TypeScript, React, Next.js, Node.js
- **Backend & Architecture**
  REST APIs, GraphQL, Microservices, Clean Architecture, SOLID Principles, Authentication (OAuth2, JWT), Webhooks, WebSockets
- **Databases**
  PostgreSQL, SQLAlchemy, Relational Data Modeling
- **DevOps & Infrastructure**
  Docker, CI/CD Pipelines, Git, Linux, Monitoring & Logging
- **Methodologies**
  Agile, Scrum, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Integration Engineer | Software Engineer • Profectum, Remote (Brazil / Germany) ***January 2024 – Present***

- Designed and maintained scalable backend services using **FastAPI**, serving internal and external systems.
- Built **REST and GraphQL APIs** with authentication, retry logic, and fault tolerance strategies.
- Developed a scalable **full stack observability platform (React + Python)** to monitor **120+ Python automation services**, enabling proactive detection **of nearly all production issues** before they impacted end users.
- Modeled and optimized **PostgreSQL** schemas ensuring data consistency and performance.
- Collaborated with cross-functional teams in agile cycles, participating in architecture and technical decisions.
- Improved system reliability through standardized error handling and monitoring strategies.

Integration Engineer • Federation of Industries of the State of Ceará (Brazil) ***June 2024 – August 2025***

(Outsourced via Profectum)

- Delivered and maintained **150+ production-grade automations** (120+ Python integrations & 30+ RPAs), ensuring seamless data flow and high-reliability standards across systems.
- Supported **go-live processes** and production troubleshooting for enterprise clients.
- Standardized **error handling mechanisms** reducing recurring failures.

Full Stack Developer • RBS Technology, Remote (Brazil) ***November 2022 – April 2024***

- Developed full-stack web applications using **Node.js (Express.js), React, and PostgreSQL**.
- Managed database persistence and migrations using **Sequelize ORM**.
- Delivered **end-to-end features** across frontend and backend layers.
- Contributed to **API design** and database schema evolution to improve system maintainability.

INTERNATIONAL PROJECT – GERMANY

Karlsruhe University of Applied Sciences (HKA)
Karlsruhe, Germany | sep 2025 - feb 2026

- **Architected** a **Full Stack data pipeline (Python/Node.js)** to pre-process **1TB+ of raw sensor data** into optimized tables, enabling **high-performance Power BI reporting** and reducing data complexity by **over 90%.**

EDUCATION

Bachelor of Computer Science *| University of Fortaleza (Unifor), Brazil |* ***GPA: 9.5/10*** *| Expected Graduation: Dec 2026*
Exchange Program in Computer Science | Karlsruhe University of Applied Sciences (HKA), Germany | 2025 – 2026
